CGM Therapy Expert Program
The Medtronic-Bayer CGM Therapy Expert Program is designed to update healthcare professionals on the most current scientific and technical information regarding sensor augmented insulin pump therapy, blood glucose meters and other related products.

The program is intended for healthcare professionals who have some experience with insulin pump therapy and continuous glucose monitoring (CGM), but are interested in advancing their clinical and practical knowledge.
WHO SHOULD ATTEND?

Healthcare professionals who:

• Have some experience managing patients with insulin pumps and CGM
• Are interested in expanding their knowledge about patient selection and protocols for insulin pump and CGM therapy optimization
• Want hands-on practice and experience programming a Medtronic sensor augmented insulin pump and Bayer CONTOUR® NEXT LINK meter
• Would like to participate in a deep-dive session on maximizing insulin pump therapy using personal CGM and CareLink® therapy management software

WHAT IS COVERED?

After attending this program, attendees will have an increased knowledge of:

• Studies and clinical evidence that demonstrate improved glycemic control for patients who use insulin pump and CGM therapy
• How to program initial CGM settings and make appropriate adjustments based on patients’ glycemic control needs
• Factors that contribute to successful management of insulin pump and CGM therapy and enhanced patient outcomes
• Resources and support systems that are available for healthcare professionals and patients
• Methods and best practices for integrating insulin pump, personal and professional CGM, and CareLink therapy into a medical practice
• How to best utilize CareLink to make appropriate insulin pump and CGM therapy adjustments
WHAT TO EXPECT

The Medtronic-Bayer Therapy Expert Programs provide practical training using a case-based approach to patient care.

The keynote speaker is a healthcare provider with expertise in managing patients on insulin pump therapy and/or CGM. Other faculty will include a team of Medtronic clinical experts who will lead discussions and facilitate practice exercises with hands-on training and case study presentations.

The objectives and content of each program are adjusted and tailored based on the attending clinicians’ Curriculum Vitae and feedback provided on the pre-program survey. Although programs may vary, an outline of a typical agenda can be seen on the next page.

The day’s agenda is ambitious; however, there is plenty of time for questions and discussion. The attendance at these programs is capped to maximize opportunity for group discussion and collaboration.

Thank you for considering this opportunity. We are confident the curriculum will broaden your expertise and enhance your technical knowledge of insulin pump and CGM therapy.

*We look forward to having you as our guest.*

**FREQUENTLY ASKED QUESTIONS**

*How do I register for the CGM Therapy Expert Program?*
Your Medtronic Sales Representative will provide you with registration information.

*Are there any requirements for attendance?*
You will need to submit an up-to-date Curriculum Vitae to attend the program. In addition, you may be asked to sign a Non-Disclosure Agreement (NDA).

*Will meals be provided?*
The following meals are included as part of the Medtronic-Bayer CGM Therapy Expert Program:
1) Breakfast: Served outside the meeting area 30 minutes prior to start.
2) Lunch: A modest lunch will be provided the day of the program.
3) Dinner: An optional company sponsored dinner may be held. Please speak with your Medtronic representative for details.

*Additional meals will be reimbursed according to the AdvaMed Code.* (A copy of the Medtronic Clinician Expense Policy will be provided with your program materials.)

*Is there a cost to attend?*
No.
Are CME credits available?
This course does not offer Continuing Medical Education (CME) credits.

Will I be compensated for my time?
No. This is an educational program and there is no compensation. However, all travel and meal expenses incurred in relation to this program will be covered.
This diabetes education program is supported by Medtronic and Bayer.
